

# How to Find Hidden Information in Financial Statements

3 CPD HOURS

Programme Code: P171103ZHC

## Course Overview and Outline

This interactive workshop delves into the 'hidden information' that every company has. This workshop will focus on operating ratios, selected relational calculations based on numbers in the financial statements. The purpose is to show relationships between two variables that may not be visible in a casual reading of the financial statements but are important to assessing a company's overall financial health.

We will discuss some of the most common and useful ratios and how you can best use them to better understand the underlying strength of whatever it is they are measuring. This workshop will help you master the tools of finance where they can be useful to you, without wasting time explaining the deep details that will likely never benefit you.

## Key Learning Outcome

- Finding out how financial ratios can help you to pinpoint investments.
- Discovering what the critical financial ratios are and how to calculate them.
- Uncovering how to interpret the financial ratios to make investment decisions.
- Digging into how to measure and read how pricey the stock market is using its P-E.
- Looking for buy signals from financial ratios analysis.
- Quiz Time - "Who Wants to be a Finance Genius"

### **IBF-FTS Funding**

This programme is recognised under the Financial Training Scheme (FTS) and is eligible for FTS claims subject to all eligibility criteria being met. For more information please visit [IBF Website](#).
